

Number	Category	OPTIONAL - What are your hopes and dreams as we navigate our future growth of student enrollment?
1	Budget	A strong budget,
2	Budget	Maintain a balanced budget without adding burdensome increase in taxes.
3	Budget	Enough funds to continue to grow with our community and future needs for our children to have the best opportunities moving forward.
4	Budget	I didn't get a good understanding on the plans to increase the budget. I just hope the teacher's pay and benefits aren't affected.
5	Budget	I would say the most stressful portion of this is keeping a sustainable budget.
6	Budget	stay ahead financially for the future without over spending
7	Budget	Sustainable budget with controlled growth
8	Budget	Sustainable budget,
9	Budget	That budgets are maintained without personal taxes implemented.
10	Budget	During the budget section, I noticed that about a quarter of the district's income goes toward payments on outstanding debt. I would love for the district to have a goal to work toward debt reduction, which would hopefully free up additional capacity in the budget long-term.
11	Budget	We need to be able to sustain our own budget.
12	Class Sizes	small class sizes across grade levels
13	Class Sizes	Best case scenario for all is to keep teacher to student ratio under control. Allow teachers the freedom to be creative with the tools they need to teach.
14	Class Sizes	Class size stays small
15	Class Sizes	Class sizes need to be a focus with student enrollment and teacher retention.
16	Class Sizes	Class sizes remain small and make more electives available for all high school students not just 11th and 12th grades.
17	Class Sizes	Class sizes under 22 K-5. Hiring teachers with multiple years of experience.
18	Class Sizes	Continue to have smaller class size,
19	Class Sizes	Continue with the strong teacher to student ratio!!! Love the use of aids in the classrooms.
20	Class Sizes	Don't over pack the classrooms.
21	Class Sizes	For students to have an acceptable student to teacher ratio
22	Class Sizes	For students to teacher ratio to remain how it currently is.
23	Class Sizes	Good student teacher ratio and adding 5/6 intermediate
24	Class Sizes	Keep class sizes low and continue to make us feel welcome.
25	Class Sizes	I hope we can retain our quality staff and keep class to teacher ratio low.
26	Class Sizes	I hope we continue a low student to teacher ratio.
27	Class Sizes	Class size is important.
28	Class Sizes	I hope we keep the student/teacher ratio low.
29	Class Sizes	I want class sizes to remain small. We chose MV because it was smaller than surrounding communities. I would prefer not to fill it up with people who don't live here trying to escape the same situation. We moved here for that reason. We need to provide quality education to our in district kids.
30	Class Sizes	I want to continue to see a good ratio of teachers to students. I don't want to see student numbers growing and staff numbers staying stagnant.
31	Class Sizes	Also smaller class sizes
32	Class Sizes	I would love to see the classrooms stay under 21-22 students per class. More than that is unnecessary and doesn't help the learning environment.
33	Class Sizes	I would hope that we could maintain the lower student to teacher ratio we currently have. Hopefully the residents in the district will partner with the school during this growth.
34	Class Sizes	Just to make the class sizes reasonable in all grades
35	Class Sizes	Keep child to teacher numbers low, to meet child needs.
36	Class Sizes	Keep class sizes small.
37	Class Sizes	Keeping student-teacher numbers low to provide the best education we can.
38	Class Sizes	Low class sizes
39	Class Sizes	low classroom sizes, increased administrative support for teachers in order to hold parents more accountable rather than cower to all their demands,
40	Class Sizes	Low student to teacher ratio
41	Class Sizes	Maintain good student teacher ratios
42	Class Sizes	Maintaining low teacher to student ratio,
43	Class Sizes	Keeping lower student per teacher ratios
44	Class Sizes	My hope is to keep classroom size on average 20:1
45	Class Sizes	My main hopes for the schools are... to adjust the buildings so that the classroom size stays below 30.
46	Class Sizes	One reason I chose MV over HSE schools was because of this great community and lower class sizes. I would like the class sizes to remain low, and
47	Class Sizes	Smaller actual class sizes not mathematically derived calculations. The chart presented a skewed view .. if the increase was truly as significant in classroom teachers the class size average would be tiny ..but without the specifics on those 'adds' the numbers do not ring true. It also did not take the dissolving of Joint Services into account and how that impacted budget and how those costs are not fully recoverable but are required.
48	Class Sizes	Smaller class sizes especially at the HS
49	Class Sizes	Keep class sizes low.
50	Class Sizes	Student teacher ratio so classes our smaller
51	Class Sizes	Sustain the classroom ratio and small school feel. Keeping up with technology and children's needs.
52	Class Sizes	Sustain the student to teacher ratio. Keeping class sizes small has a significant impact on early learning, specifically at the elementary level. We moved to this community due to the smaller class sizes but have seen them increase this year and it is very concerning.

53	Class Sizes	That as enrollment increases we will still be able to provide the student teacher ratio we currently have while being able to expand the types of classes we offer.
54	Class Sizes	That class size remain under 30. That the student/teacher ratio remain as it was graphed/shown at the meeting.
55	Class Sizes	The class size can remain smaller and give every student equal opportunity to succeed.
56	Class Sizes	To continued to keep the student/teacher ratio at a good level.
57	Class Sizes	To maintain the good level of teacher to student ratio I don't want it to get over crowded. I believe you would have to build another school or add on to the high school in order to keep the #'s correct.
58	Class Sizes	Very important to keep teacher to student ratio
59	Collaboration	I love to see that parent and staff input has been taken into consideration. This has been a nice change.
60	Collaboration	My hope is that the communities voice matters. Too many times you hear of districts taking votes for misc. things and the board votes the complete opposite. So my hope is for transparency and open minds.
61	Collaboration	Thank you for taking the time to gather parents thoughts regarding these changes and decisions. I appreciate the active listening and time to get information from the community.
62	Collaboration	Thanks for a great meeting tonight. Appreciate all the hard work and dedication to our MV school system. I am really interested in getting your thoughts about how the faith community can be involved in the future growth and cooperation with the school system.
63	Collaboration	That communication is kept imperative and the opinions of everyone is respectfully considered based on a diversified community not just one perspective
64	Community	Continue to hold students and families to the high standards and values that have been long-standing in the district.
65	Community	A successful and collaborative community of students, parents, families, staff, and community members ensuring successful and happy students.
66	Community	I really want to improve the community options (town center) to draw in more tax dollars and
67	ECA	Continue to add opportunities for students that we have not yet implemented. (I.e., lacrosse, Orchestra, 5th grade sports)
68	ECA	Additional athletic programs available.
69	ECA	I hope to see school activities and sports remain readily available to students without only encouraging the elite; especially at the elementary and middle school level. With the increase of student enrollment, it's important to ensure we are giving our best to the established students and families.
70	ECA	maintaining plenty of clubs/activity/sports for all students that desire to be involved to have the opportunity.
71	ECA	more clubs, more sports
72	ECA	Never again w pay to play. Keep funding arts. Band option for kids that don't want marching band
73	ECA	continued accessibility to academic, club, and sports activities despite growth.
74	ECA	In all seriousness though, keep enough clubs and groups that my kids can still be involved and won't get lost in the shuffle is my hope.
75	Environment	increased administrative support for teachers in order to hold parents more accountable rather than cower to all their demands,
76	Environment	All students are provided with best possible environment that encourage optimal learning opportunities.
77	Environment	For kids to be a name and not a number
78	Environment	Healthy, happy kids. Thinking through what truly is best for our kids. Staying on top of their mental health by keeping parents informed and involved.
79	Environment	I DO NOT want our district to become an HSE or Fishers and redistrict kids multiple times.
80	Environment	I feel that our schools are a great path currently. A continuing push to make schools safe & fun learning environment is very important.
81	Environment	I grew up in a district our current size. It felt small enough I did not feel lost. I feel our district has that same feeling. My hope is that as we grow we can keep that small size feeling
82	Environment	I hope MV continues to regard themselves as a school people WANT to attend and do everything possible to attract staff that is capable of giving our children the best education/experiences possible. I would love to keep the smaller school feel but understand that with growth and excitement of the area, comes more kids and families. I just hope MV keeps the respect and dignity of the small school feel and doesn't not get messy.
83	Environment	I hope that MVCS core values do not change. I have worked in Carmel and HSE districts, and I can say the community feel and staff love that is felt here is what pushed me to come work for this district.
84	Environment	I hope that we are able to celebrate our diversity as a school system.
85	Environment	I hope we don't get so large that there isn't a sense of community. \
86	Environment	I moved here because I wanted to live in a town that felt like family and felt small outside of the city. I am worried that the more this town grows and school grows we will lose that small town feel.
87	Environment	I want my child to attend a school district that is deeply rooted in their community and invested in providing world class educational experiences and oportunities for ALL learners.
88	Environment	I would hope with the growth that MV maintains the close community feeling it currently has. Coming from LT, there was a disconnect between all the schools, almost a rivalry and competition, when it should be one corporation.
89	Environment	I would like to see the educational environment contained to one large campus. And one high school campus.
90	Environment	If we have to grow bigger then to be certain to add more opportunities to our students as a trade off to losing the " more persons experience" of a smaller school.
91	Environment	Maintain the same level of commitment to the students and better embrace the organizations that support the schools like the Optimist club that include all kids not cater to travel sports programs that are more elitist
92	Environment	Maintain the spirit and direction of the MVCC as highlighted on the video.
93	Environment	More diversity in both leadership and student body. Better teacher pay to be more in line or better than neighboring districts.
94	Environment	It would also help to include diversity trading amount students as Mt Vernon becomes more diverse
95	Environment	My hope is that MVCS appreciate and celebrate cultural differences and become more proactive in recruiting and hiring more culturally diverse staff members, My dream is that students will seek to become life long learner because of the educational experiences received at MVCS.
96	Environment	My hopes is to maintain the smaller feel that invests in our students! I don't want to feel like a corporate institution similar to a college or other larger school community. We moved here specifically for the smaller schools from Brownsburg. We're looking forward to the continued growth and doing so with community input. The growth is a testament to the school board and community as a whole and we are proud to be here!!

97	Environment	Change is inevitable, but we chose this district because of the smaller community feel. Are there ways to maintain that?
98	Environment	That my children have a safe and nurturing environment to thrive and learn. Low numbers of students per classroom teacher.
99	Environment	That students can learn in a comfortable and safe learning environment and not feel overwhelmed by the size and poor planning of the past. Build buildings based on learning not based on sports.
100	Environment	That we retain a small school environment
101	Environment	To consider that MV is sought after due to its small environment and not lose sight of keeping size under control while still providing a great education and experience.
102	Environment	To maintain the atmosphere we currently have. Student friendly
103	Environment	to make priority enrollment those in the community and without criminal record
104	Environment	We find the best option for students to be better prepared for their future grade. Making sure they have role models to show them how to behave.
105	Environment	We have been happy with the attention to student learning and hope that won't change as we grow. We moved from a larger school district because of a job and intentionally chose MVCSC because it was smaller and a good program.
106	Environment	We like the district because of the smaller size and the down to earth people and community. It's not the monster that HSE is. If possible, it would be great to try to keep that community and "small town" feel as the size grows. Easy request right ;) you asked for dreams!
107	Environment	We moved out of HSE's district in order to send our children to MV. We feel that MV has a small town feel, with a strong community focus, where all the students feel like they know one another. Our family would love to see those factors remain constant in spite of the growth. To be frank, if a family is looking for a "large" school, one of the most prestigious in the state is right next door (HSE). MV's advantage over HSE is that it is smaller, and therefore can offer the familiarity and connection that a huge school cannot.
108	Facilities	Always build larger cafeterias than what you think you need, so you don't end up with too many lunch periods. I've seen this happen at many schools!!
109	Facilities	Fully utilize all buildings before building another school.
110	Facilities	Seeing a 4 next to HVAC and fresh air is terrifying. I hope that you make this a priority for our buildings.
111	Facilities	Build buildings that meet 21st century skills
112	Facilities	That we decentralize the location of our school buildings.
113	Facilities	Need to build a Elementary School, put 5th and 6th grade back over to Fortville Elementary.
114	Growth	I hope we can start this process before we experience any overcrowding.
115	Growth	I want to be cautious with our growth.
116	Growth	I would recommend looking at local school districts such as HSE and Westfield who have sustained increasing student enrollment each year in large numbers. I would hope MV would reach to administration in those districts to ask what was done right, wrong and if they could something over, what would it be. I
117	Growth	If we faction our schools' grade levels too much, we will break up siblings that could be in the building together. That would mean less sibling support and comfort level. Also, separate schedules and programs would put more of a logistics burden on parents.
118	Growth	It will be difficult to manage growth/classrooms/finances, but I do trust that the district is in good hands. I'm happy that we are looking ahead and planning versus being overcrowded and behind the gun to get something done.
119	Growth	My hopes and dreams are that we have a solid plan to address future growth and enrollment so that my children and students can thrive at Mt. Vernon. I hope that educational programs do not suffer.
120	Growth	Open an Intermediate School, based upon the enrollment projections and building capacities, the middle school is soon to be full and the elementary schools are not far behind.
121	Growth	Proactively planning for growth and utilizing a referendum when necessary.
122	Growth	Stability and sustainable growth
123	Growth	The district needs to be proactive and grow in a positive way. Look to the future as an opportunity not a necessity. MV can be a leader as long as we have good role models. MV has changed and is growing our staff needs supporting growing as well.
124	Growth	To continue on the same path while there is constant growth with new opportunities and programs. This meeting was awesome ☐
125	Growth	Utilize legislative strategies to limit out of district transfers
126	Growth	Be open minded to possibilities
127	Growth	Adding another elementary school to the district.
128	Growth	Create an elementary or intermediate school north of railroad tracks. I feel this would help your transportation budget and traffic congestion going back and forth
129	Growth	I would anticipate another redistricting at some point (we were impacted by the first one). While I realize those are "growing pains" of a booming community (see Fishers), it also feels unfair to those families who are residents of the MV district, and in many cases decided to move here because of the great schools.
130	Growth	I dread that we will end up with students being shuffled around and redistricted to other schools away from what they are used to and friends that they have made. I realize that there may come a point when new schools need to be added which is inevitable. If the property size allows at our current schools, I would prefer to see additions made to current schools first to accommodate growth. We moved to this district because I heard the horror stories from families within HSE district where their kids went to a different school almost every year through elementary, etc because of redistricting.
131	Growth	As we have recently moved our family out of district, we hope mt vernon will continue to allow those out of district students to continue to attend. This subject is very important to our family as our children are rooted in this district without care that we live two miles east of district line.
132	Learning	I really hope we continue the focus on helping every student learn at a high level and the wide variety of learning paths that are offered..
133	Learning	A mind set of growth, and to continue that growth.
134	Learning	Continued focus on student education vs time on standardized tests, 75% 100% plan that can be adjusted if assumptions are wrong
135	Learning	Focus on academics, core curriculum.
136	Learning	Meet goals for children

137	Learning	My dream would be for MVCSC to continue to offer a high quality education to all students even as the corporation grows.
138	Learning	My hope is for MVCS to be an academic powerhouse
139	Learning	I would love for the elementary schools to adopt a more comprehensive reading and writing program, such as The Units of Study by Lucy Calkins, to ensure rigorous instruction for all students.
140	Learning	Stay focused on the student individual needs and educational outcomes.
141	Learning	That ALL students have a chance to find and explore their strengths and weaknesses while maintainig a strong traditional curriculmn.
142	Learning	That we offer a strong and exciting path for all students, including high Academic students
143	Learning	To continue helping students achieve
144	Learning	To not compromise excellence,
145	Learning	A good education.
146	Programming	Reduced tuition (Pre-School?)
147	Programming	More cultural options i.e. foreign language and exchange student programs
148	Programming	Consider dropping the balanced school calendar as it put additional stress on parents to locate child care for students. As a dual parent home with an elementary student, and with almost for weeks vacation in a professional career, we find it hard to juggle the additional weeks off between us as well as find time for family in between. Thank you
149	Programming	Additional language opportunities in elementary
150	Programming	Classes such as home economics, financial education, small engine repair,
151	Programming	Continue to expand educational opportunities and advance placement opportunities for all students
152	Programming	Continue to focus on helping to make our children marketable in a global market. Begin Spanish in elementary school. Technology will continue to be at the core in the future. More focus on academics.
153	Programming	Continue to grow technology and higher educational opportunities.
154	Programming	Continue great programming,
155	Programming	Continued growth and addition learning opportunities. Expanded curriculum of extracurricular classes available.
156	Programming	Hope is that we can sustain the many programs offered currently through the loss of the increment years and dream is to add more advanced technology and vocational programs to the curriculum without sacrificing faculty salaries or eliminating positions.
157	Programming	Hopes the we extend programming for exceptional students at all levels especially middle school. We are not doing enough at the middle school level to prepare them for honors and ap classes at high school
158	Programming	I did not hear enough about academics. This felt like a thinly-veiled ploy for a referendum in the future.
159	Programming	Are you investigating OERs and making sure that Mt. Vernon students are digitally and information literate?
160	Programming	increase families moving in for ADM dollars. Keep expanding programs and learning labs- hands on approaches, maker spaces and engineering
161	Programming	I think it would be great to partner with colleges for a senior high where all or most classes they take are cross over 100 level classes. From a regionally accredited university.
162	Programming	more advanced choices for middle school students. Right now the middle school only offers advance classes for Math and English. I would like to see advanced classes in Science and Social Studies as my student is not challenged in these areas. Advance PE is a wonderful option this year. She loves it!
163	Programming	I'm not sure of the logistics whatsoever, but I know some districts offer magnet schools. I just would like to see more true personalized learning and finding student strengths and having programs in place to help them develop.
164	Programming	Incorporating a dual language or full language immersion program starting at the preschool/elementary school grade level. The existing international student exchange program would complement a program such as that quite well, and present a unique set of opportunities for both visiting students/staff and existing MVCSC students/staff. Thank you for your efforts. I look forward to hearing the tentative plan in a few months!
165	Programming	Increase student voice and opportunities for real world problem solving
166	Programming	Keep the 4 block schedule at our high school,
167	Programming	Maintaining or increase academics, dual/AP opportunities, arts electives, and community initiatives at MV schools
168	Programming	Mentoring programs for our students. Keeping lower student pernteacher ratios
169	Programming	More AP learning opportunities
170	Programming	provides (vocational, technical and college prep)
171	Programming	for all of the art programs to remain, if not grow.
172	Programming	My hope would be that as students grow and if it is a diversified growth that the curriculum would also grow and become more diversified.
173	Programming	To assure that the funding for the Arts Program will not be cut and to possibly head a volunteer like myself to gather grants and funds to strengthen the Arts Program throughout the district.
174	Programming	Staff for all grade levels increasing certified teachers. Vocational classes in district without sending students to other district schools.
175	Programming	Maintain student access to resources and programs, not just the availability of the programs but the percentage of students who can or are participating...highly engaged.
176	Programming	Strings program at middle/high school and potential for a Pre-K through 14 school with collaboration with commuter or branch colleges.
177	Programming	Sustain growth, allow our students greater opportunities, while managing the retention of information.
178	Programming	I LOVE that we have an aviation class, how cool is that? I always would want the arts to remain as important as stem, not everyone wants to be an engineer.
179	Programming	those that may not be academic focused but may be a great with his or her hands...offering a trade school within the district
180	Programming	The only thing I dislike about this school district at this time is that elementary goes early and middle and high are later. I feel allowing the older kids go to school later takes away the urgency of life skills they will need in the future.
181	Programming	Middle school is 7th and 8th grade.
182	Programming	To provide a possible middle school, or high school within the Mt. Comfort area.
183	Programming	I also would like to see the advanced classes and extra curricular activities continue as it looks like you're already doing a good job offering variety there.

184	Programming	Longer summers and more traditional calendar. Shorter fall and spring breaks. Kids with two parent working families have inconsistency with breaks when parents need to find childcare that is not offered free or cheap during fall and spring breaks.
185	Programming	Able to not have large transitions that hurts current students experiences
186	Safety	I want our students to get the correct amount of support in a safe environment. The current middle school is not safe for students. The halls are too small. The glass classrooms are unsafe. It really bottlenecks traffic in those halls.
187	Safety	A True no bullying policy.
188	Safety	Additionally, safety is everyone's #1 concern.
189	Safety	A safe and fun environment for students to learn and thrive
190	Safety	Better learning environment. I hear about weekly altercations at the high school and drug dogs...that isn't the kind of environment I want my kids in.
191	Special Education	Special education would continue to evolve to keep current with student needs and the management of 504s, IEPs and evaluations will be monitored closely to guarantee students are receiving their minutes and additional accommodations.
192	Special Education	More work put into special ed
193	Special Education	opportunities that challenges all students (Special Ed included)
194	Special Education	To also make sure the Special Education Department does not lose funding and to see the strand strengthen in resources.
195	Special Education	Special Education Department needs more resources for students with special needs. We need teachers and support staff as we are seeing more students with special needs enter our school corporation.
196	Staffing	Competitive salaries to keep great teachers and hire great teachers with experience. Some great candidates have had to decline due to low salaries.
197	Staffing	Continue hiring and training quality teachers.
198	Staffing	quality educators
199	Staffing	Continued excellence in teaching
200	Staffing	Diversity and more competitive teacher pay. We need to attract and retain the best teachers in central Indiana. This cannot be accomplished by "lowballing" teachers who are the backbone of this outstanding school corporation.
201	Staffing	Dreams: appreciated and supported teachers and staff who encourage a life-long love for learning and literacy in our students.
202	Staffing	Find ways to keep good teachers while encouraging the less effective teachers to find other opportunities, so kids have the best teachers.
203	Staffing	Higher teachers with experience, not just new and less expensive teachers.
204	Staffing	I hope that sustaining the quality teachers that MVCSC currently employees stays at the forefront of the administration's mind. I also hope programs and resources within schools (like licensed and valued librarians at the secondary level) are kept to help teachers and students within our schools. My dream is that my son who is currently in elementary school and my daughter who is a future MV student will have access to the same quality education that is currently offered at MV, and the quality of the education will not diminish while the enrollment numbers increase.
205	Staffing	I hope that we will sustain a low student to teacher ratio as we growth.
206	Staffing	I hope the high school changes to a new schedule as block 4 is not the best schedule for students. I hope that we get enough teachers to actually get our classes under 25. I hope teacher salaries actually become comparable to other schools in our area. I hope our students get their elective classes back and do not spend 1/4 of their day in study halls. I hope we find a substitute situation that does not include 10 classes of students all in one auditorium.
207	Staffing	I hope that we start removing additional, non-educational burdens from the shoulders of teachers so they can spend time actually teaching and engaging with students in meaningful ways.
208	Staffing	high quality teachers paid competitively to attract and retain,
209	Staffing	Identifying those staff members that are not meeting expectations. Evaluation process still seems to keep all staff regardless.
210	Staffing	I would love to see a high class library media center in each building with a certified staff librarian. We are doing our children a disservice with ten dollar and hour assistants running our libraries. Teachers deserve the support as well. Having the library aide all over the building doing other tasks makes it impossible to do the job well.
211	Staffing	Since my children graduated, the number of administrators has increased exponentially.
212	Staffing	I heard that there was a plan to cut one of the librarians; this would be a mistake.
213	Staffing	I'd also like to see a continued increase in teacher pay.
214	Staffing	I would like to see diversity amongst the teaching staff, school board, and the office of the Superintendent. The world is different than what the kids are exposed to here so they need to experience that.
215	Staffing	I'd love if pay for teachers was an incentive to KEEP great teachers here for the kids. We are losing people and that is disheartening.
216	Staffing	Increase staff
217	Staffing	offer pay comparable to schools equal in size instead of us being one of the lower paid districts, be sure to cut the fat on all levels and not just the bottom.
218	Staffing	Better teacher pay to be more in line or better than neighboring districts.
219	Staffing	More diversity within staff is needed to make and students.
220	Staffing	More pay for educators.
221	Staffing	More teachers... more pay for staff
222	Staffing	Pay raises for teachers and all staff.
223	Staffing	Provide enough staff-and benefits - to keep good staff. Teachers should be paid their years experience, not capped at a certain number. We NEED to keep good teachers and staff to service our students. A lot of staff members are moving to other townships due to their pay and or benefits. This has to change.
224	Staffing	Quality education, favorable teacher/student ratio, responsible common sense fiscal planning and execution, plans for staff talent retention and recruiting AB
225	Staffing	That teachers will continued to be supported and not experience a pay freeze. With teachers being supported this includes teachers furthering their education (masters) and getting paid appropriately based on this. As student growth goes up so does students provided with special education. Teachers need to be given trainings and PD's to deal with these students, along with the appropriate support and action plans in place.

226	Staffing	That we pay our staff more so that we can hire and retain highly qualified staff.
227	Staffing	That you hire more administrators, teachers and staff from outside the system, and not connected to the legacy MV'ers to create a more fair, less nepotistic environment.
228	Staffing	The continuation of strong teacher support.
229	Staffing	The single greatest impact on economic development is the education of the workforce. We can continue to attract the best and brightest teachers by being creative. Places like Indianapolis have created teacher housing to assist with teacher salaries. Other communities have offered forgivable loans for teachers who move to the district and stay for five years. This could be done in conjunction with the county, the town and the school.
230	Staffing	Also, accounting for diversity (among staff) would be great! How can we be progressive with inclusivity in our community?
231	Staffing	We maintain the current levels of success without putting additional burdens on our teachers. We can not afford to drive good educators out of our district or the profession.
232	Staffing	With the growth of MV I would hope to see a more diverse staff, specifically teachers and leaders.
233	Staffing	You HAVE to provide enough support staff to carry out these plans. At times, there is not enough support to carry out these things-assistants, custodians, secretaries, etc.
234	Technology	The chrome books have been highly beneficial to the students and I fee the 4 year plan for that is spot on.
235	Technology	I hope we ease off on technology and stop substituting ckicking on "educational programs" with actual, good teaching.
236	Technology	Keep utilizing technology and advancing in that direction.
237	Technology	move away from 1-to-1 as a primary mechanism for teaching and use it instead as a supplement. The technology is not necessarily proving to be better for students when it comes to comprehension.
238	Technology	Keeping up with technology and children's needs.
239	Transfer	Continue to tightly monitor out of district enrollment.
240	Transfer	Continue to value the transfer families that have invested in this community over the past years.
241	Transfer	Control number of transfer students
242	Transfer	Current Transfer students continue to be considered and valued as a part of the MV community. As parents, we have invested time building relationships and invested money into our community, programs and schools. We LOVE MV and continue to stand strong with our community!
243	Transfer	Enrollment -- Realizing it's a sensitive subject... it would seem doing away with out of district enrollment altogether would make a lot of sense in managing the rapid growth of the district.
244	Transfer	Look at leasing an out of district building where transfer students could enjoy Mt Vernon curriculum loser to their homes
245	Transfer	I would like to see fewer transfer students into our schools.
246	Transfer	I would also like to see all current transfers in good standing be able to stay since a lot of them don't know any different. Also- some moved out of district once it was passed.
247	Transfer	If transfer students end, I'd like all current transfer students to be grandfathered in.
248	Transfer	consider limiting new out of district transfers into our schools as we continue our growth.
249	Transportation	Air conditioned busses.
250	Transportation	Air conditioned buses
